PORTFOLIO

VexOrderPlat

- Production-ready microservices design with Kafka and multi-technology containerization.

[Access Link](#)

AsheOs

- Production-ready full-stack system project featuring React 19 (Next.js) on the frontend, Java 17 (Spring Boot) on the backend, a PostgreSQL database, and S3 storage (MinIO).

[Access Link](#)

PsyLu

- A simple and intuitive web-based system for psychologists to manage patients, appointments, and patient histories. Designed specifically for professionals with limited technical familiarity.

EXPERIENCE

Web Developer

Exiti Digital Solutions

08/2022 - 09/2024

Ilha Solteira, Brazil

Developer of custom software, web and mobile applications for companies in general.

Achievements/Tasks

- Developed and maintained the 'Atalayas' dam monitoring web system using JavaServer Faces, microservices using Express and Spring Boot (with Spring Security and Spring Data JPA) for report generation (PDF, DOCX, XLSX), reading parameter calculations, and email/WhatsApp notifications. Used by 16 power plants and dams. Configured Spring Cloud Gateway and Eureka for service discovery; designed and developed 'Chuva Vazão' (Rainfall-Flow) hydrological scenario web application using React.js and Next.js, with a Spring backend for telemetry API integration, initially designed to serve 2 companies.
- Wrote Dockerfiles and hosted applications on the Azure Kubernetes platform using Linux terminals.
- Performed PostgreSQL database maintenance; created and maintained PL/pgSQL functions.
- Created and maintained continuous integration and continuous delivery (CI/CD) pipelines using Bitbucket Pipelines.
- Applied Clean Code practices, focusing on SOLID principles and design patterns, utilizing linting tools such as ESLint and SonarLint.
- Implemented the Gitflow workflow, structuring the code lifecycle with environment-specific branches (dev, stage, main) and standardizing Pull Requests and code review policies.

Tech Lead

Exiti Digital Solutions

01/2024 – 06/2024

Ilha Solteira, Brazil

Developer of custom software, web and mobile applications for companies in general.

Achievements/Tasks

- I organized Jira sprints, along with planning meetings, daily stand-ups, and one-on-ones for the team of six programmers.
- I was responsible for reviewing and merging the team's pull requests.
- I maintained the responsibilities of the Web Developer role.

Systems Analyst

Ceres Sistemas

10/2020 - 03/2022

Pereira Barreto, Brazil

Automation of chemical laboratories and agriculture.

Achievements/Tasks

- Developed and maintained the 'Ceres One' web application for chemical and agronomic analysis laboratory automation (built with JavaServer Faces) and the 'Ceres Boletão' web service (built with JAX-RS), both hosted on AWS EC2 and used by 10 laboratories.
- Implemented system integration with the PlugNotas invoice API.
- Performed maintenance on a PostgreSQL database hosted on AWS RDS.
- Provided support for and maintained the legacy 'Ceres' application (built with Java 8 Swing), used by approximately 40 laboratories.

IT Technician

Ceres Sistemas

01/2019 - 10/2020

Pereira Barreto, Brazil

Automation of chemical laboratories and agriculture.

Achievements/Tasks

- Participated in the design of 'Ceres One', a JavaServer Faces web application for automating chemical and agronomic analysis laboratories, hosted on AWS EC2 and used by 10 laboratories.
- Performed maintenance on a PostgreSQL database hosted on AWS RDS.
- Provided support for and maintained the legacy 'Ceres' application (built with Java 8 Swing), used by approximately 40 laboratories.
